DETAILED ACTION

1. This communication is responsive to your preliminary amendment filed 3/31/05. Claims 1-12 are currently pending in this application.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

3. The drawings are objected to because Fig. 1 and 2 should be labeled "Prior Art". Also, all rectangular boxes in Fig. 3 should be labeled. See 37 CFR 1.83. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the

applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 1-12 are rejected under 35 U.S.C. 102(a) as being anticipated by Foxall P.N. 6,492,881.

Foxall discloses a Nuclear Magnetic Resonance imaging method and apparatus. The method interleaves the acquisition (see e.g. col.3 lines 36-39) of odd and even echoes produced by a pulse sequence into two k-spaces. See lines 15-16 of col. 6. The interleaved acquisitions are for the same physical region as when imaging a slice as described in line 58 of col. 4.

Note that the use of partial Fourier reconstruction is contemplated by Foxall as described in the last paragraphs of col. 6.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Song discloses a method for obtaining a combined image from partial k-space frames derived from a single excitation. Note the use of compensating pulses and z-shimming.
